Introducing our revolutionary **LED technology Ceiling Panels**. Clean area approved, they are ideal for office environments, commercial and healthcare establishments. They have exceptional light output and have been designed to replace recessed modular fittings - can be recessed or surface mounted.

Lightweight with a slim profile, the **LED Panel** is a stylish energy saving lighting option. Full illumination is instantaneous and emergency back up is available.

The high output LED ceiling panel is easy to install, has 3 independently controlled panels via a variety of lighting controls for a truly bespoke solution.
